STG - (A) United States patent

AB - Pelletized adsorbent compositions and methods of adsorbing toxic
target compounds are provided for the destructive adsorption or
chemisorption of toxic or undesired compounds. The pelletized
adsorbents are formed by pressing together powder nanocrystalline
particles comprising a metal hydroxide or a metal oxide at pressures
of from about 50 psi to about 6000 psi to form discrete
self-sustaining bodies. The pelletized bodies should retain at least
about 25% of the surface area/unit mass and total pore volume of the
starting metal particles.
